PRESENTATION HIGHLIGHTS

FOCUS AREAS

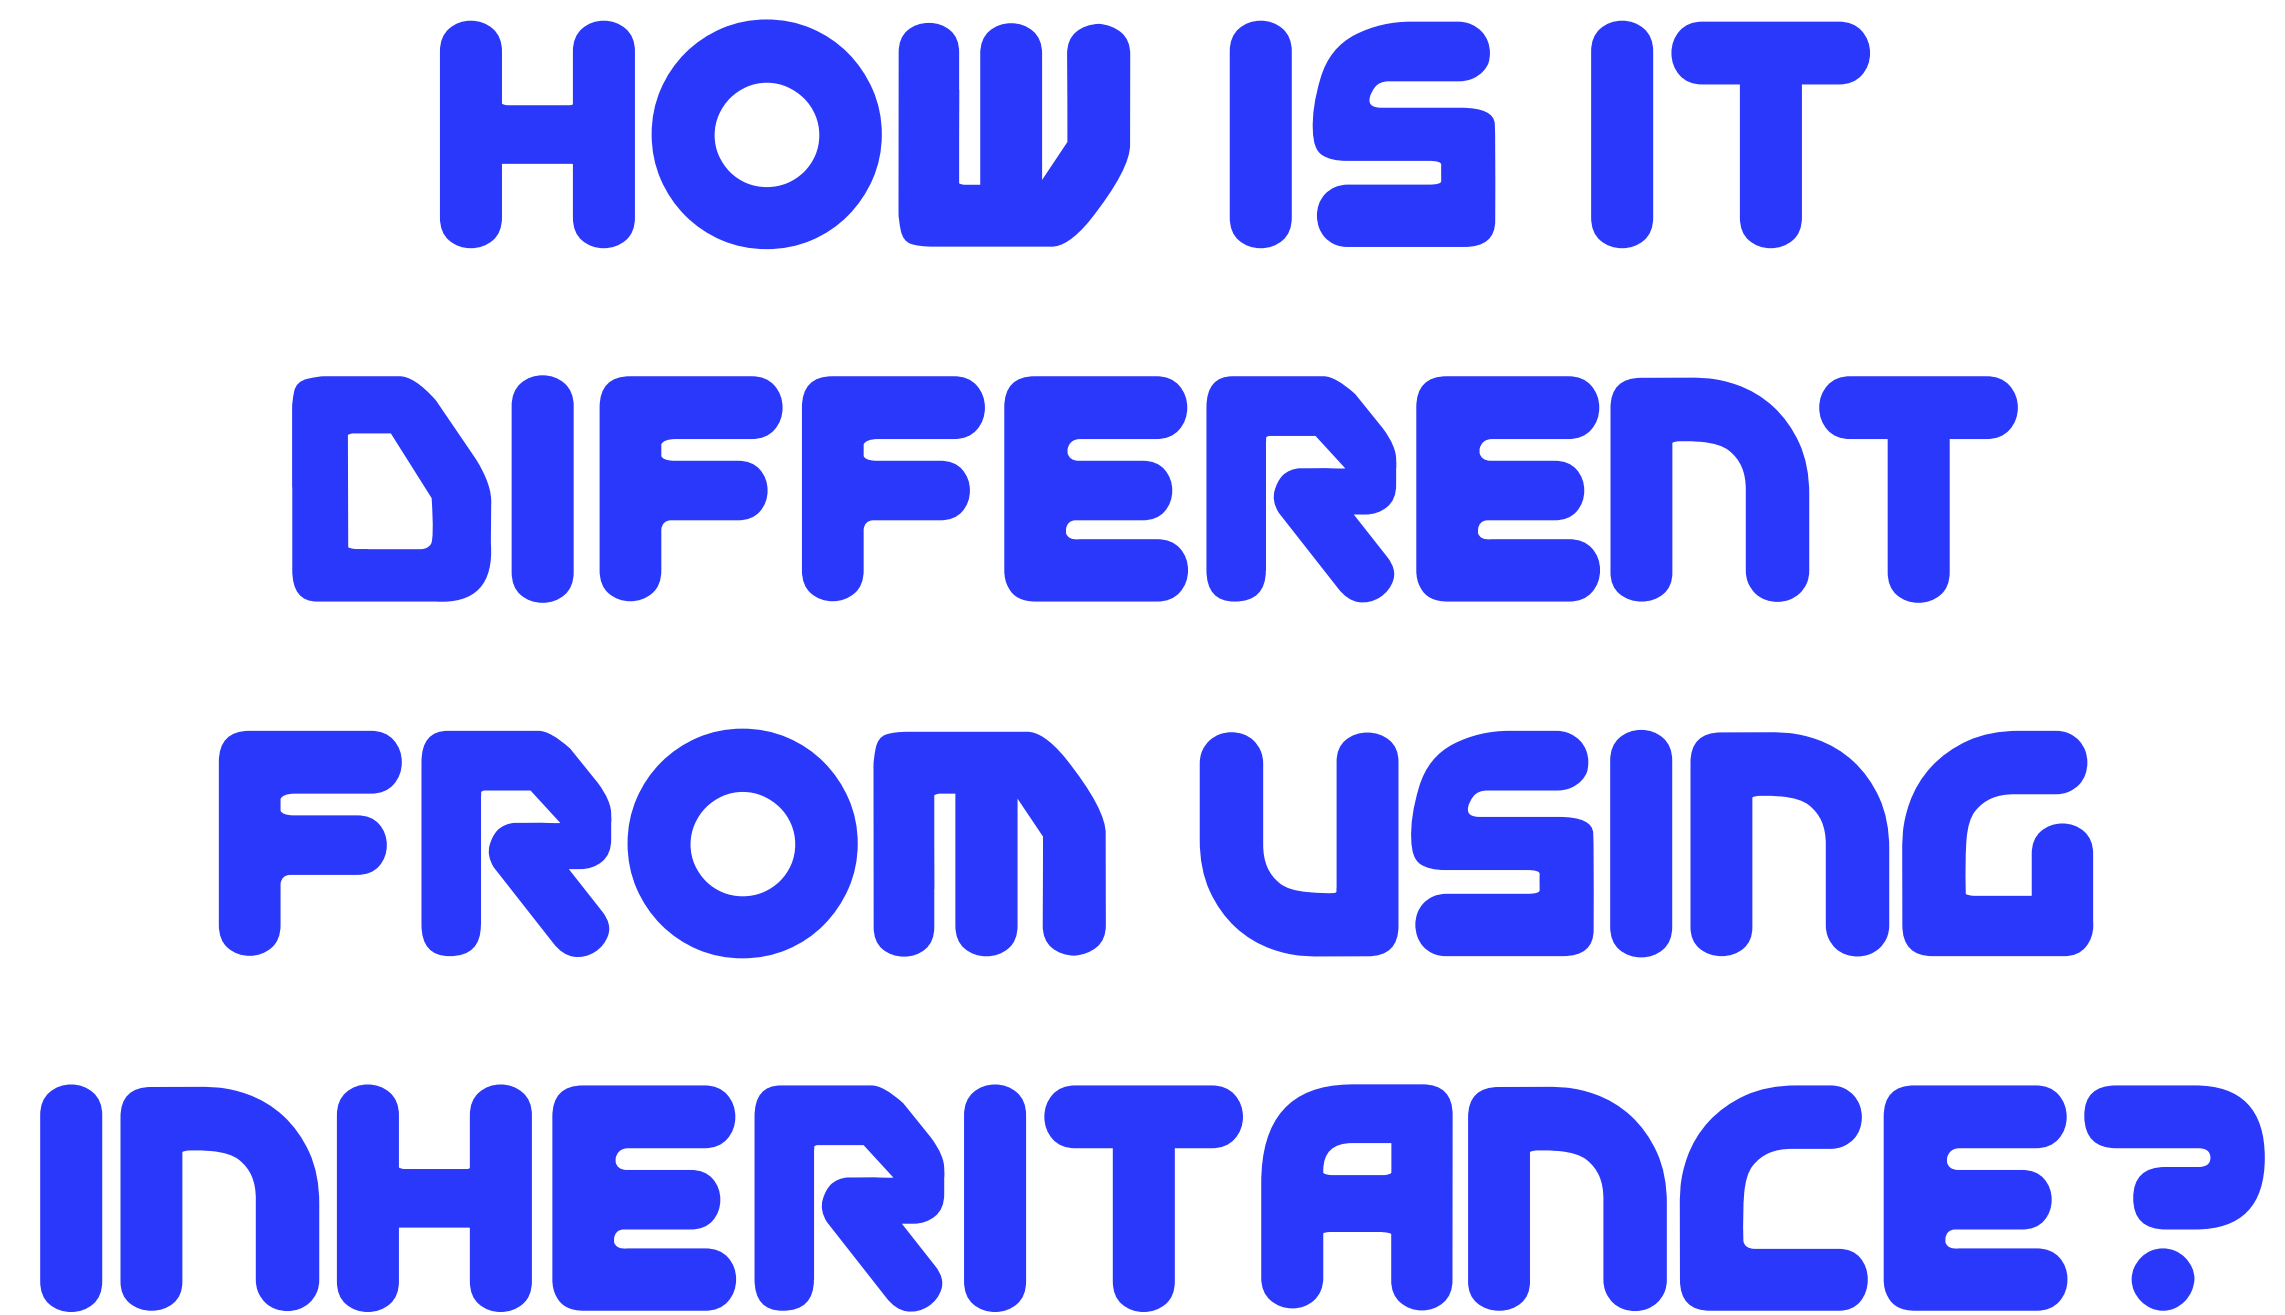

- What is a decorator object and what does it do?
- How does the decorator pattern work?
- How is it different from using Inheritance?

What is a decorator object and what does it do?

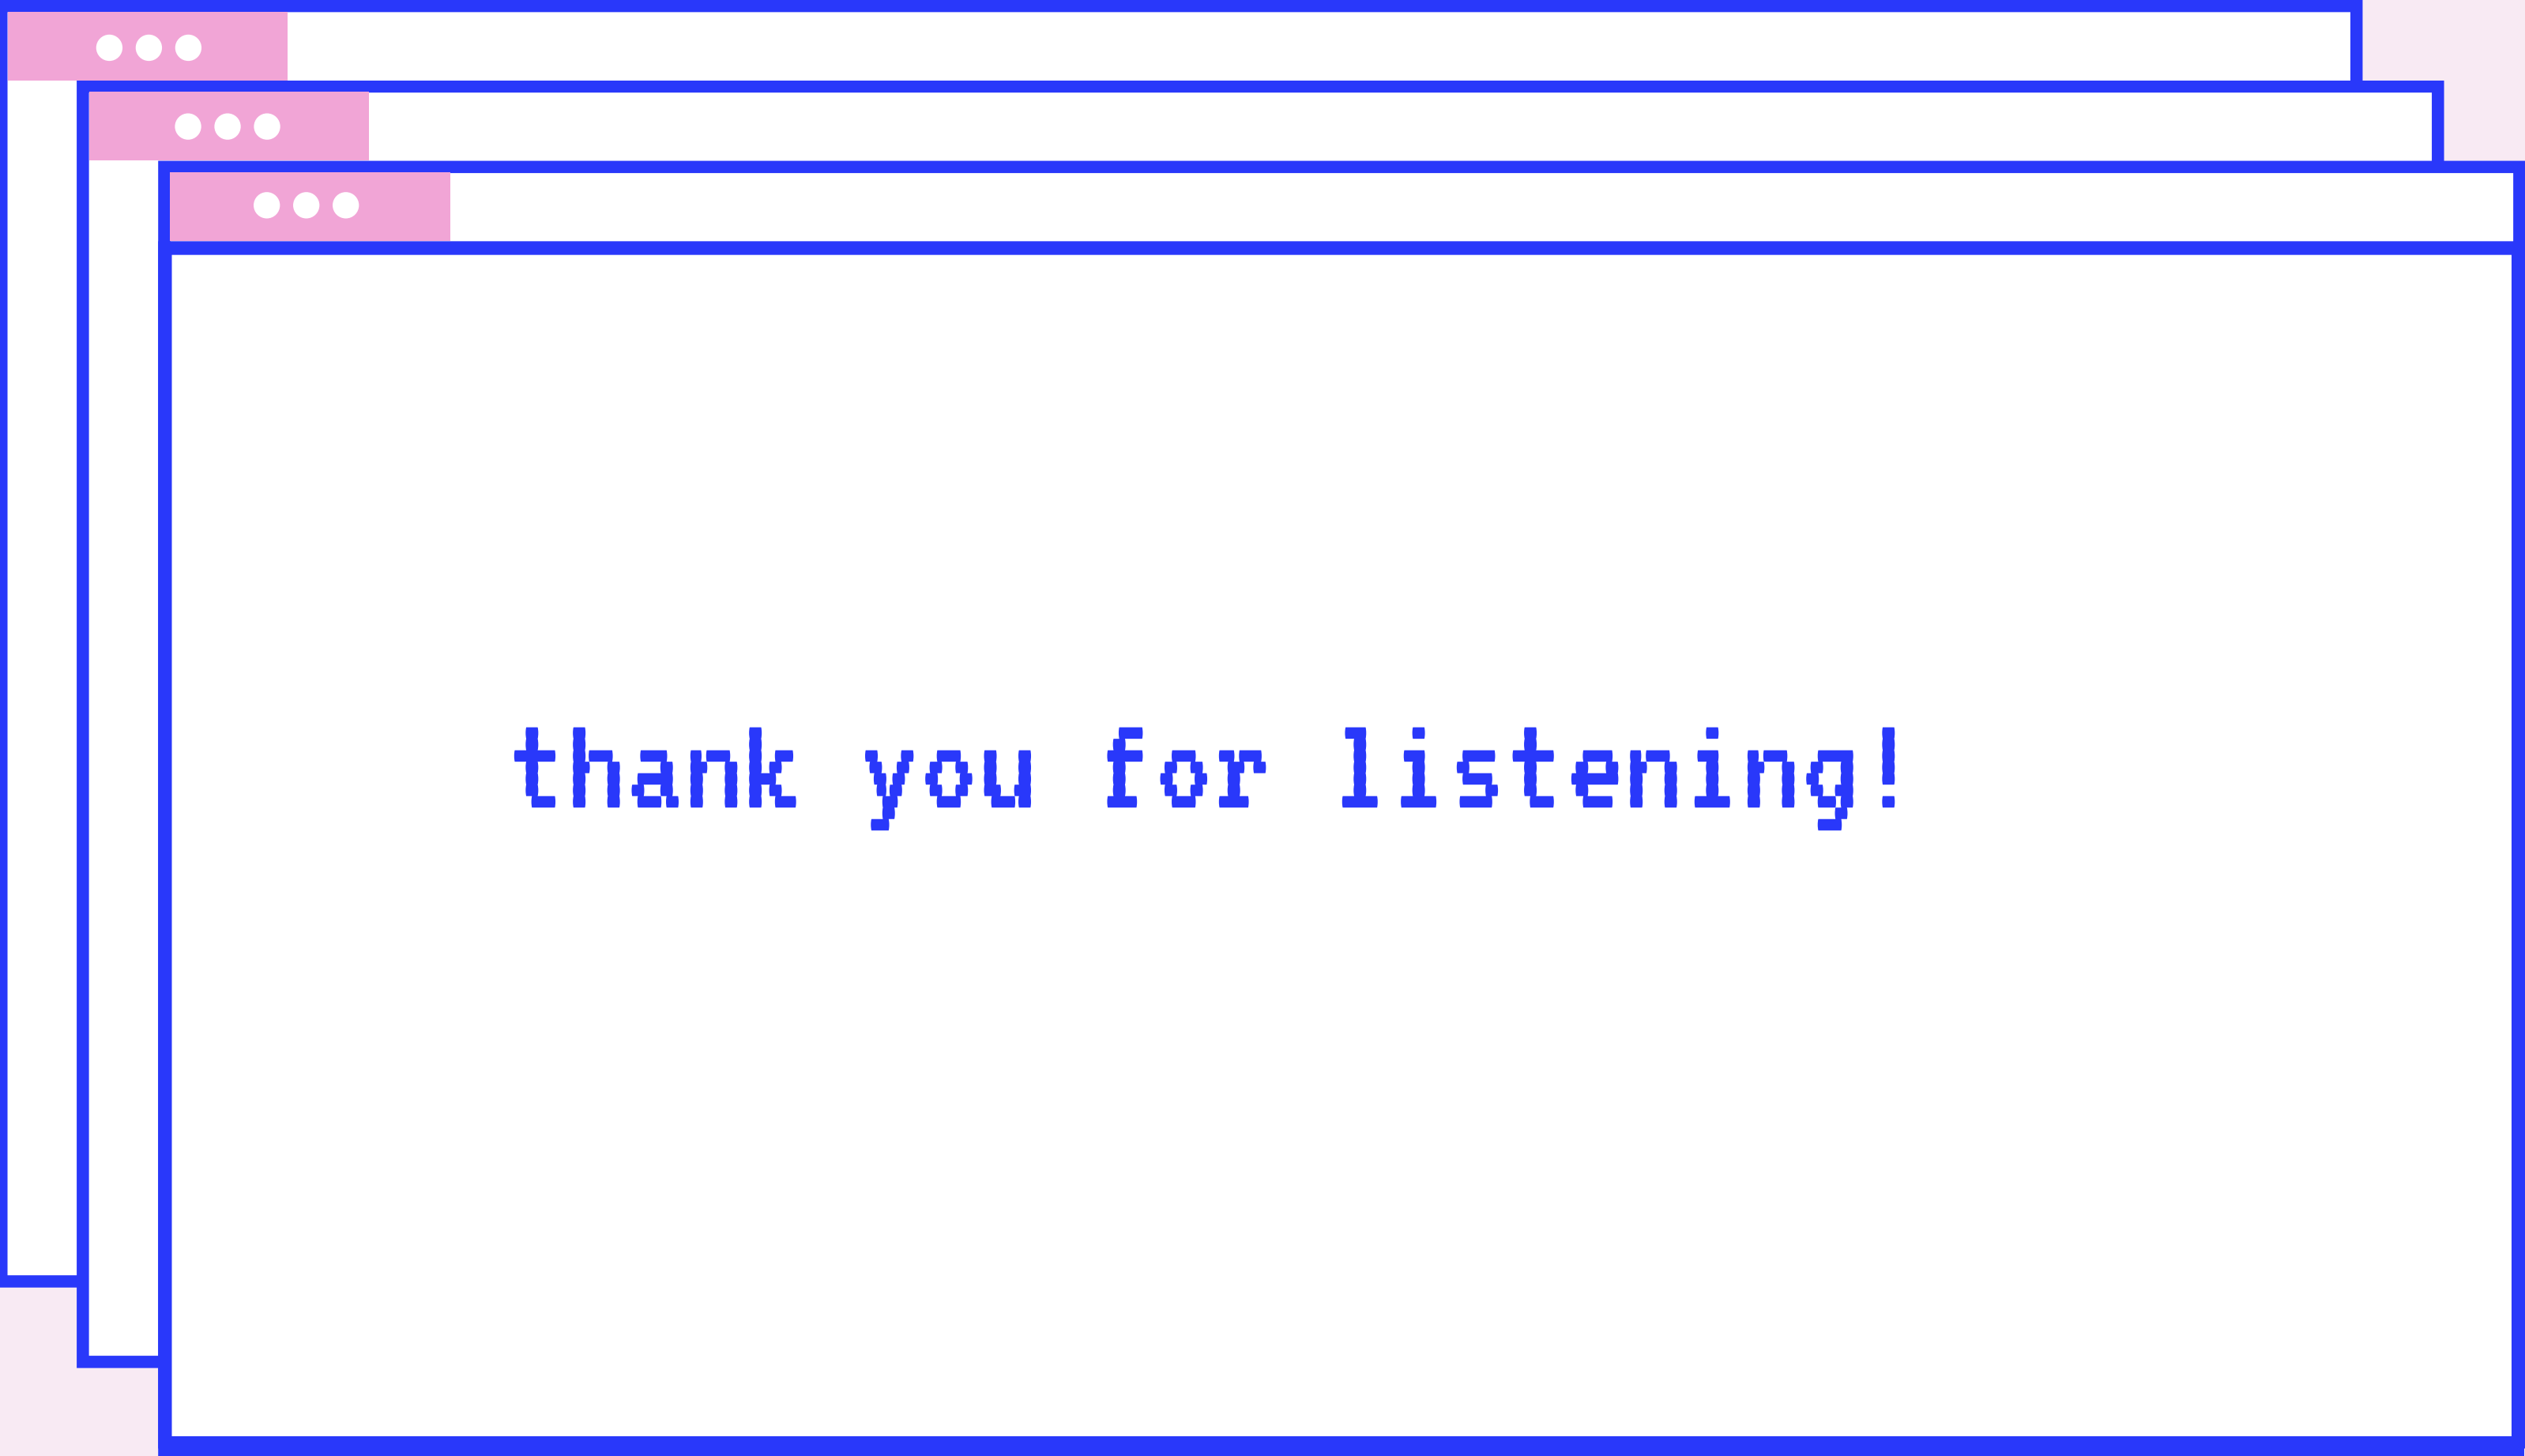

Decorator pattern is a way to add more functionality to the base object without changing its nature (by modify the code or adding subclass with distinctive feature)

HOW DOES THE DECORATOR PATTERN WORK?

**HOW IS IT
DIFFERENT
FROM USING
INHERITANCE?**

thank you for listening!
